SUMMARY

Computer Science undergraduate passionate about building scalable web applications, AI-powered solutions, and cybersecurity tools. Experienced in developing full-stack applications, designing responsive user interfaces, and deploying production-ready projects. Experienced in coordinating and managing college-level events, demonstrating teamwork and organizational abilities. Strong problem-solving abilities with a focus on software engineering best practices, API integration, and secure application development. Continuously exploring artificial intelligence and cybersecurity while contributing to real-world projects.

TECHNICAL SKILLS

Programming Languages : JavaScript, Python, Java, C, HTML5, CSS3

Frontend : React.js, Vite, Tailwind CSS, Bootstrap, Framer Motion

Backend : Node.js, Express.js, FastAPI, Django, REST API Development

Databases : MongoDB, MySQL, Firebase

Developer Tools : Git, GitHub, Visual Studio Code, Vercel, Render, Emailjs

PROJECTS

Password Security Analyzer | React.js, Vite, FastAPI, Python

- Developed a full-stack web application to evaluate password strength using entropy analysis, pattern detection, and multiple security checks.
- Implemented breached password detection and common password validation to help users identify weak or compromised credentials.
- Built a secure password generator capable of creating strong, randomized passwords based on customizable complexity requirements.
- Deployed the frontend on Vercel and the backend API on Render, integrating both into a responsive and production-ready application.

FazilVerse – Personal Portfolio Website | React.js, Vite, Tailwind CSS, Framer Motion

- Designed and developed a modern, responsive personal portfolio website to showcase projects, technical skills, and professional achievements.
- Created an interactive user interface using React.js, Tailwind CSS, and Framer Motion to deliver smooth animations and an engaging user experience.
- Integrated a functional contact form and optimized the application for performance, accessibility, and mobile responsiveness.
- Deployed the application on Vercel with a scalable codebase, serving as the foundation for the ongoing development of FazilVerse v2.

EVESTA – Location-Based Event Discovery & Recommendation Platform (Final Year Group Project) | Django, Python, Flutter, MySQL, REST APIs

Role: Team Leader & Frontend Developer

- Led a four-member development team, coordinating project planning, task allocation, and ensuring timely completion of project milestones.
- Designed and developed the web interfaces for the Admin, Coordinator, and User dashboards, focusing on responsive design, usability, and intuitive navigation.

- Collaborated with the backend team to integrate frontend components with Django-based REST APIs and MySQL database for seamless application functionality.
 - Contributed to system design, project documentation, and the preparation and delivery of the final project presentation, ensuring clear technical communication and successful project demonstration.
-

EDUCATION

Bachelor of Technology in Computer Science and Engineering	2022 - 2026
KMCT College Of Engineering , Kozhikode • APJ Abdul Kalam Tecnological University (KTU)	
Higher Secondary Education (Class XII)	2021
PHSS Pandallur , Pandallur • 85% percentage	
Secondary Education (Class X)	2019
PHSS Pandallur , Pandallur • 100% percentage	

LEADERSHIP & ACTIVITIES

Team Leader – EVESTA (Final Year Project)
Led a four-member team in planning, designing, and developing a location-based event discovery platform. Coordinated task allocation, project milestones, and technical discussions while contributing to frontend development and project documentation.
Event Coordinator – KMCT College of Engineering
Organized and coordinated academic and cultural events by managing volunteers, collaborating with faculty members, and ensuring smooth event execution.

TECHNICAL HIGHLIGHTS

- Developed and deployed a full-stack Password Security Analyzer with password strength evaluation, breach detection, and secure password generation.
- Designed and deployed FazilVerse, a responsive personal portfolio website showcasing technical projects and skills.
- Led the development of EVESTA, a final-year group project focused on location-based event discovery and recommendation.
- Built and deployed multiple web applications using modern frontend and backend technologies, following responsive design and deployment best practices.
